What Is a Wall Hung Toilet?

A **Wall hung toilet** is a modern toilet design where the bowl is fixed directly to a wall rather than sitting on the floor. The cistern and pipework are hidden behind the wall, supported by a strong internal steel frame.

This creates a floating appearance, with the toilet bowl suspended above the floor, leaving open space underneath.

Key Features of a Wall Hung Toilet:

- Hidden cistern inside the wall or frame
- No visible floor contact
- Flush plate instead of traditional handle
- Adjustable installation height

The result is a sleek, modern look that enhances the feeling of space in any bathroom.
